Dhaka, Bangladesh

SUMMARY

Fresh graduate in Computer Science & Engineering, curious to learn new technologies and want to create impact in the web development field with knowledge and skills.

SKILLS

- Tailwind CSS
- HTML 5
- React
- Node JS
- Express
- MongoDB

PROJECTS

1. Tales From Bangla
A local tour project of exploring landscapes, traditions, and flavors of Bangladesh with local guides.
Features
- **User specific booking list:** After booking a service, users can see their booking list in My Schedules page. This is user specific, means user can only see his/her booked services not others.
- **Add Services:** User can also add services if they want. After adding a service, it will be displayed in Services page and also in My Services page where users can see their added products. This is also user specific.
- **Manage Services:** Users can manage (update / delete) their added services in Manage Services page.

  Link: Live Site | **GitHub (Client)** | **GitHub (Server)**

2. Brandwheels.com
An automotive project of different car brands. User can see different kinds of car's deatils, add cars to their shopping cart and contact with us to buy.
Features
- **Update Products:** User can update products after login through Update a Product form.
- **Adding Products in Cart:** After login, user can add product to cart and can see those stored products in My Cart page.
- **Deleting Products from Cart:** User can also remove the products he / she added in the cart.
